

# Unified for Change: A Partnership Creating Life-Saving Outcomes

In a groundbreaking collaboration, Unified Group Services joined forces with an Indiana-based specialty hospital to bring a handful of clients fully into the network to drive down healthcare spend with a unique solution.

The program operates with the precision of a Partnered Provider Network, where every facet of care is seamlessly integrated. Through data analysis and strategic planning, Unified leveraged the power of information to drive targeted solutions.

Unified Group Services embarked on a mission to lower costs and improve outcomes through:

Text-based  
communication

Eliminating  
waste

Fostering a culture  
of wellness

## Results

Better outcomes through integrated, strategic care after 2 years with the program.

Total Savings:

**\$1,007,678**

## Direct Member Impact

A member of the plan couldn't afford her diabetes medication. She'd cut it in half, to manage the cost, but that resulted in trips to the ER 4 times a month. The network was able to engage her through our Rx Advocacy Solution—getting her a prescription that she could afford that would keep her healthy.

“This Partnership has elevated our healthcare solutions, and more importantly, helped members get prescriptions they need at prices they can afford.”
